

University of Ibadan

Ibadan, Oyo State, Nigeria

About the Site

The University of Ibadan is Nigeria's oldest and most prestigious university and a recognized leader in healthcare education, research, and clinical training. Students rotate primarily through the University College Hospital (UCH), one of Africa's foremost teaching hospitals and referral centers.

The program also incorporates simulation laboratories, point-of-care testing facilities, community pharmacies, specialty clinics, and university health services, providing a broad view of pharmacy practice across multiple healthcare settings.

Student Experience

Students participate in medication history collection, medication reconciliation, prescription review, patient counseling, pharmaceutical care planning, clinical documentation, and multidisciplinary ward rounds. Additional experiences include simulation-based learning, point-of-care testing, community pharmacy practice, public health programming, and chronic disease management.

The diverse practice settings allow students to understand how pharmacists contribute to patient care across both institutional and community-based healthcare environments.

Highlights

- Premier teaching hospital experience
- Clinical pharmacy and ambulatory care exposure
- Simulation and point-of-care testing training
- Community and specialty pharmacy experiences
- Global health and cross-cultural learning opportunities
