

University of Nigeria, Nsukka (UNN)

Nsukka & Enugu State, Nigeria

About the Site

The University of Nigeria, Nsukka is one of West Africa's leading institutions for healthcare education and research. Howard students complete their clinical training primarily at the University of Nigeria Teaching Hospital (UNTH), a major tertiary-care facility providing advanced healthcare services across numerous medical specialties.

Students also have access to the University's state-of-the-art Patient Simulation and Demonstration Centre, where simulation-based learning complements hospital-based experiences and strengthens clinical skills within a safe learning environment.

Student Experience

Students rotate through specialty areas including oncology, intensive care, emergency medicine, ambulatory care, and HIV/TB services. Activities include participation in ward rounds, patient counseling, medication therapy management, pharmacovigilance, antimicrobial stewardship, prescription validation, and pharmaceutical care documentation.

Simulation activities further enhance learning through point-of-care testing exercises, mock pharmacy encounters, and evidence-based clinical discussions.

Highlights

- Tertiary-care teaching hospital experience
- Oncology and infectious disease pharmacy exposure
- HIV/TB and public health programming
- Advanced simulation-based training
- Interprofessional patient care experiences
